## BASS GUITARS

### **Contrabass Guitar**

This is the original American Label range Bass Guitar, which is continuing to be popular. It is an exceptionally fine super-streamline Bass Guitar with contour-carved body and micro-adjusted fingerboard. It is now made with the new high-gain PENETRONE pick-ups, and can be supplied in natural blonde sycamore, morrello red and blonde shaded black sunburst finish.

### **Twistratone Bass Guitar**

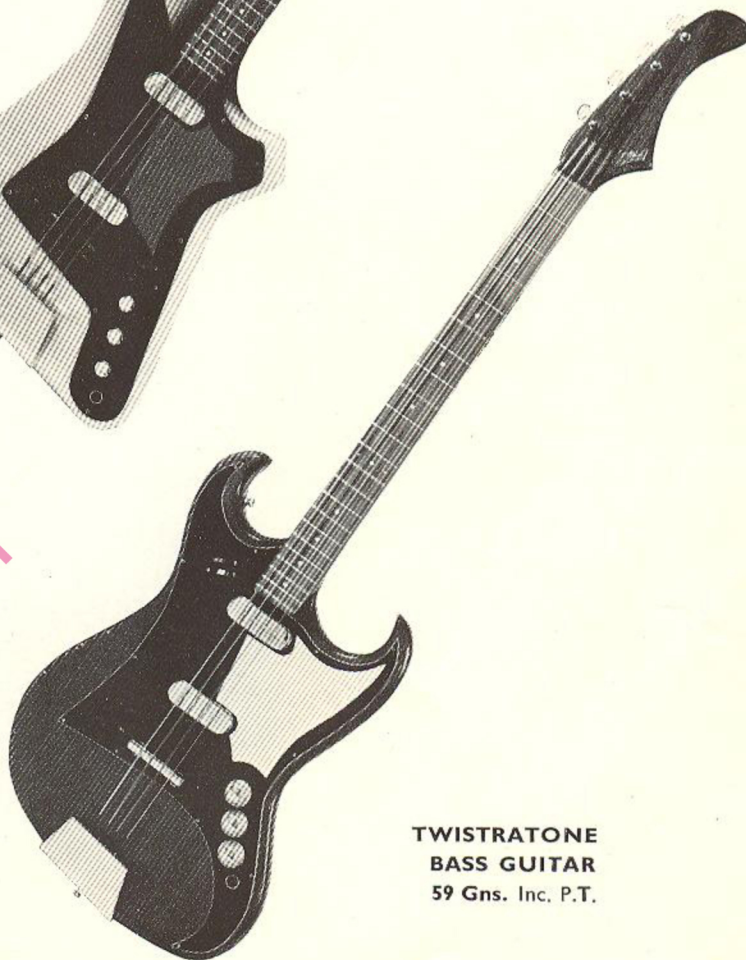

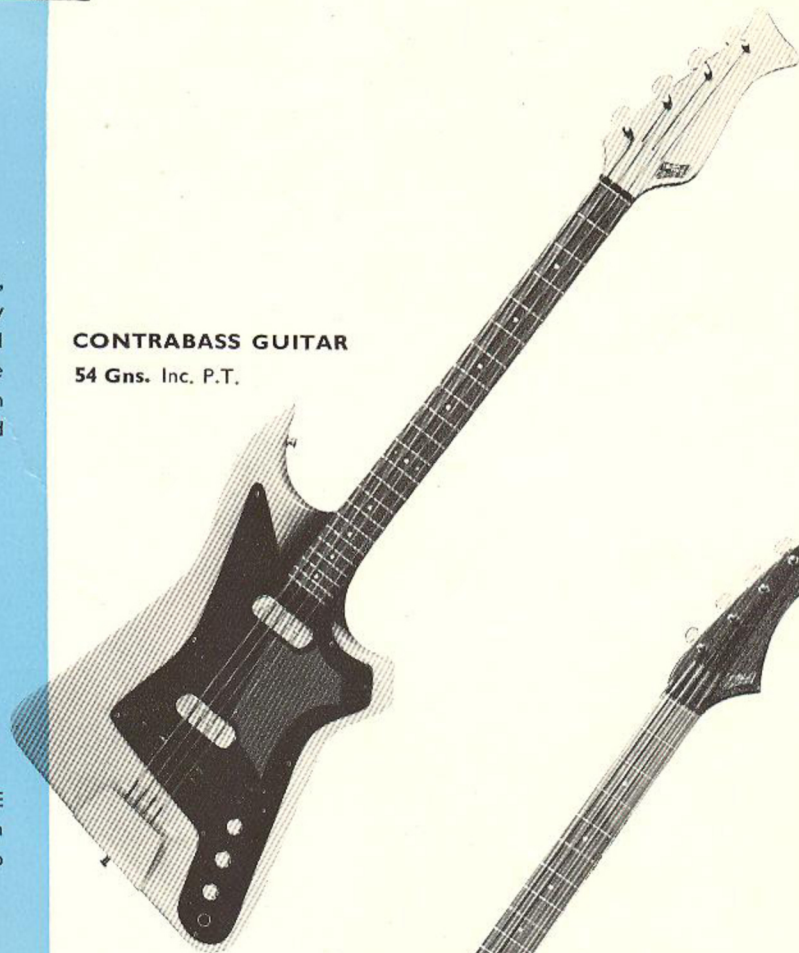

This is the Bass Guitar version to match the SPECTRATONE Guitar in shape and colour. It is manufactured with two of the latest PENETRONE pick-ups and with pick-up selector switch. Available in three finishes as above.

Both Bass Guitars are supplied with a Bass-cut switch which reduces excessive amplitude on lower frequencies and thereby prolongs the life of the speaker.
